EDUCATION

Vallurupalli Nageswara Rao Vignana Jyothi Institute of Engineering & Technology (VNR VJIET) **Hyderabad, India**
Bachelor of Technology in Computer Science & Engineering (AI & ML) *CGPA: **9.45 / 10** | Batch: 2025 – 2029*

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Machine Learning Foundations, Web Technologies.

TECHNICAL SKILLS

Languages:	Python, C++, C, Java, JavaScript (ES6+), SQL, HTML5, CSS3
Core Computer Science:	Data Structures & Algorithms (DSA), OOP, DBMS, Operating Systems, Computer Networks, Algorithmic Problem Solving
Full-Stack & Web:	React.js, Node.js, Express.js, MongoDB (Mongoose), RESTful APIs, FastAPI, Tailwind CSS, Vite
AI / ML & Tools:	Scikit-Learn, Pandas, NumPy, Machine Learning, Git & GitHub, Postman API Testing, Docker, Linux/Bash
Languages Spoken:	**Telugu** (Native/Bilingual), **Hindi** (Fluent), **English** (Professional Working Proficiency)

FEATURED PROJECTS

Smart Feedback Management System Node.js, Express, MongoDB, REST, JWT, Postman
College Hackathon Project — Enterprise Academic Analytics & NLP Classification *GitHub Repo | 2026*

- Architected a scalable RESTful backend service with Express.js & MongoDB for continuous student grievances and college administration.
- Engineered automated NLP categorization, sentiment classification, and life-safety emergency detection (CRITICAL priority).
- Implemented duplicate complaint clustering (ClusterKey) with automatic priority escalation as report count rises.
- Built role-based access control (Student, Staff, Admin) with full resolution audit trails and automated Postman test suites.

KrishiLink AI — Smart Agri-Commerce & Predictive ML Ecosystem React, FastAPI, Scikit-Learn, Node.js, Leaflet
Full-Stack Agricultural Platform with Machine Learning Integration *GitHub Repo | 2026*

- Engineered an interactive agri-commerce marketplace connecting smallholder farmers, FPOs, and bulk agricultural buyers directly.
- Integrated machine learning microservices using FastAPI and Scikit-Learn to forecast crop yield and market commodity prices.
- Designed dynamic role-based dashboards (Farmer, Buyer, FPO, Admin) with real-time trade matchmaking and interactive geolocation mapping.

ACHIEVEMENTS & CODING PROFILES

- **LeetCode (200+ Solved):** Active algorithmic problem solver (leetcode.com/u/Siddhartha_bolla) specializing in Data Structures, Trees, Graphs, and Dynamic Programming in Python & C++.
- **Smart Interviews Hive:** Actively completing algorithmic challenges and competitive coding assessments (hive.smartinterviews.in/profile/siddhartha_bolla).
- **HackerRank (5-Star Badges):** Earned 5-Star Gold Badges in Problem Solving and Python (hackerrank.com/profile/siddharthabolla1).
- **Academic Distinction:** Maintaining a top **9.45 / 10 CGPA** in B.Tech CSE (AI & ML) at VNR VJIET (Batch 2025–2029).
- **Collegiate Hackathons:** Active team lead developing scalable, production-grade applications addressing real-world problems.
